Solutions that endure

INDUFLEX

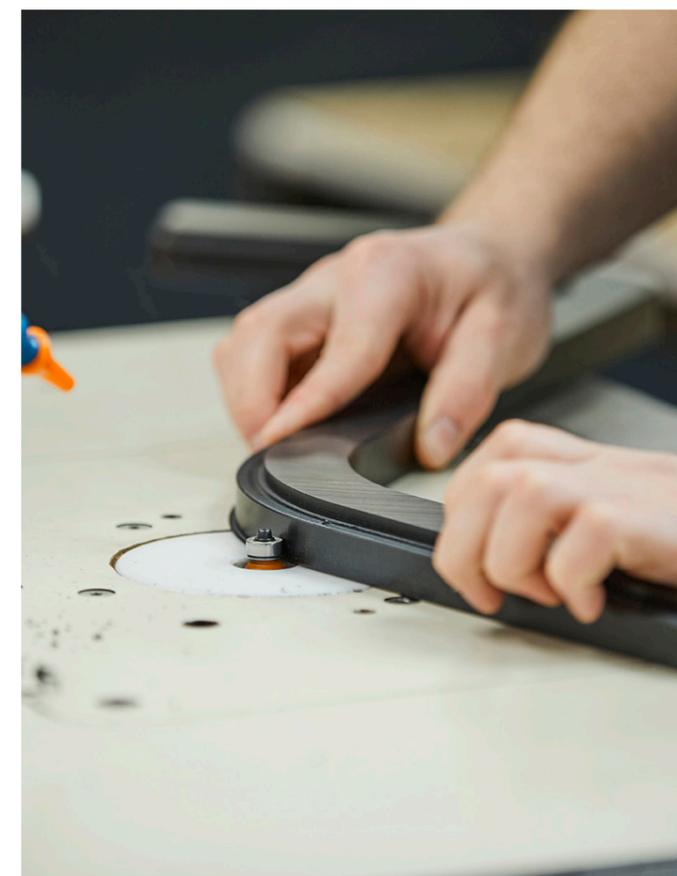

Competencies

Induflex is your supplier with more than 30 years of experience in the processing of technical plastics. With our skilled employees, high-tech production plant and wide selection of materials we can produce custom-made plastic parts that is fit for the job - even under demanding circumstances.

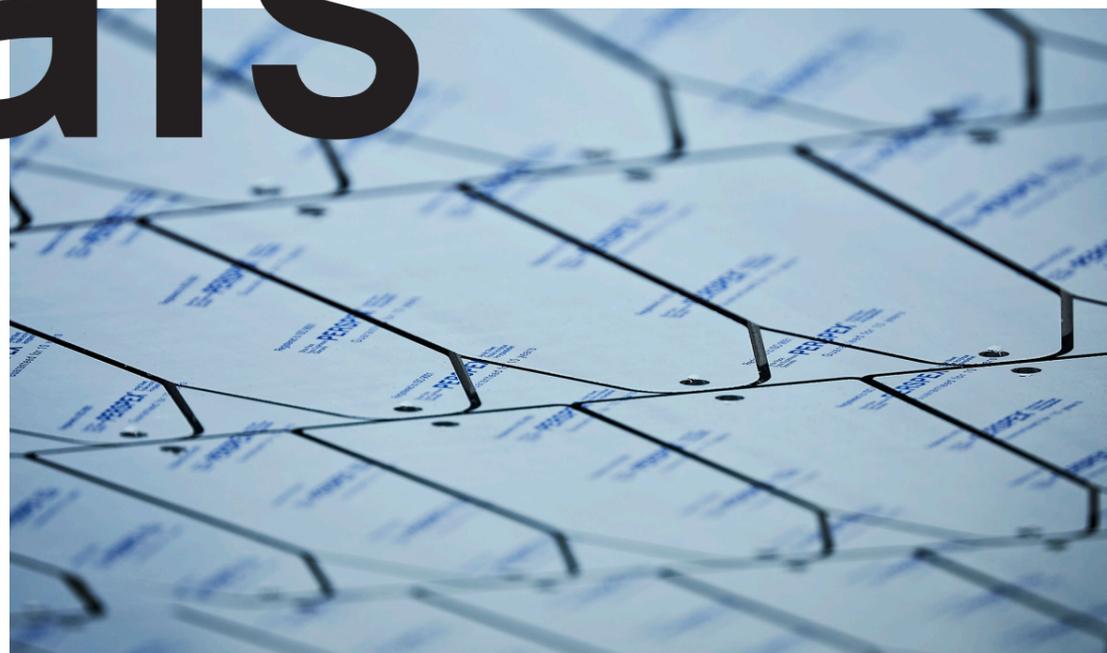

We can perform in-house CNC turning, CNC milling, cutting with knife, laser or water, print and laser engraving, and bending.

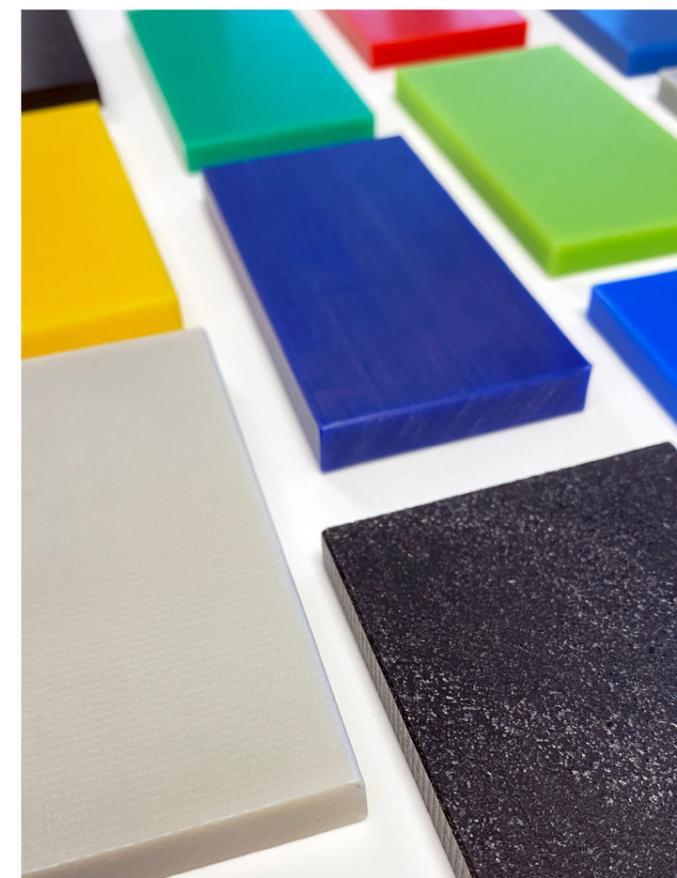

To ensure the best quality for you, we are working with the leading European suppliers of technical plastics. This allows us to produce your prototypes and solutions fast.

Ma teri als

We process extruded and
cast acrylic.

At Induflex, we have a large
stock of thermoplastics.

PEHD comes in many different
colours.

We process a wide range of technical plastics and rubber
which is suitable for technical parts and constructions. These
materials fit high technical and chemical requirements.

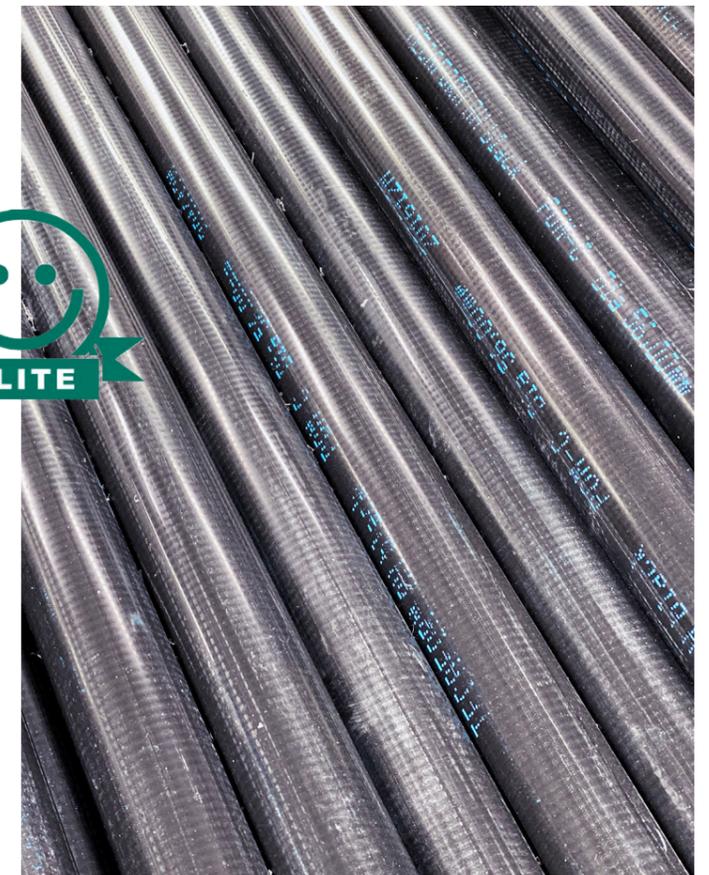

Polyamide (nylon) is a thermoplastic approved for use in food processing.

Water-jet cut polyethylene.

The materials in our inventory are ready for production of technical plastic parts.

We have POM available in the form of rods and sheets.

Are you in the food processing industry? We can make plastics approved for use in food processing. We have an elite-smiley in food contact materials (FCM) and we can provide you with the relevant documentation and approvals.

Our technical team
possesses great know-how
about the materials and
their qualities. We can guide
you towards the perfect
material for your product.

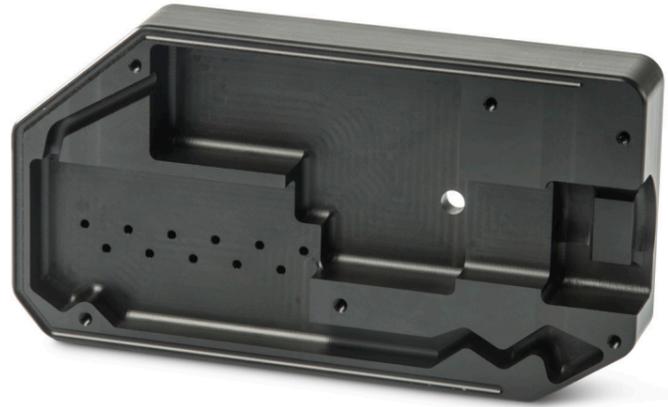

Machine parts

Induflex is your supplier with more than 30 years of experience in the processing of plastics. Our expertise and our versatile production plant can turn your design into a product that is fit for even the most demanding job.

Machine part in black POM.

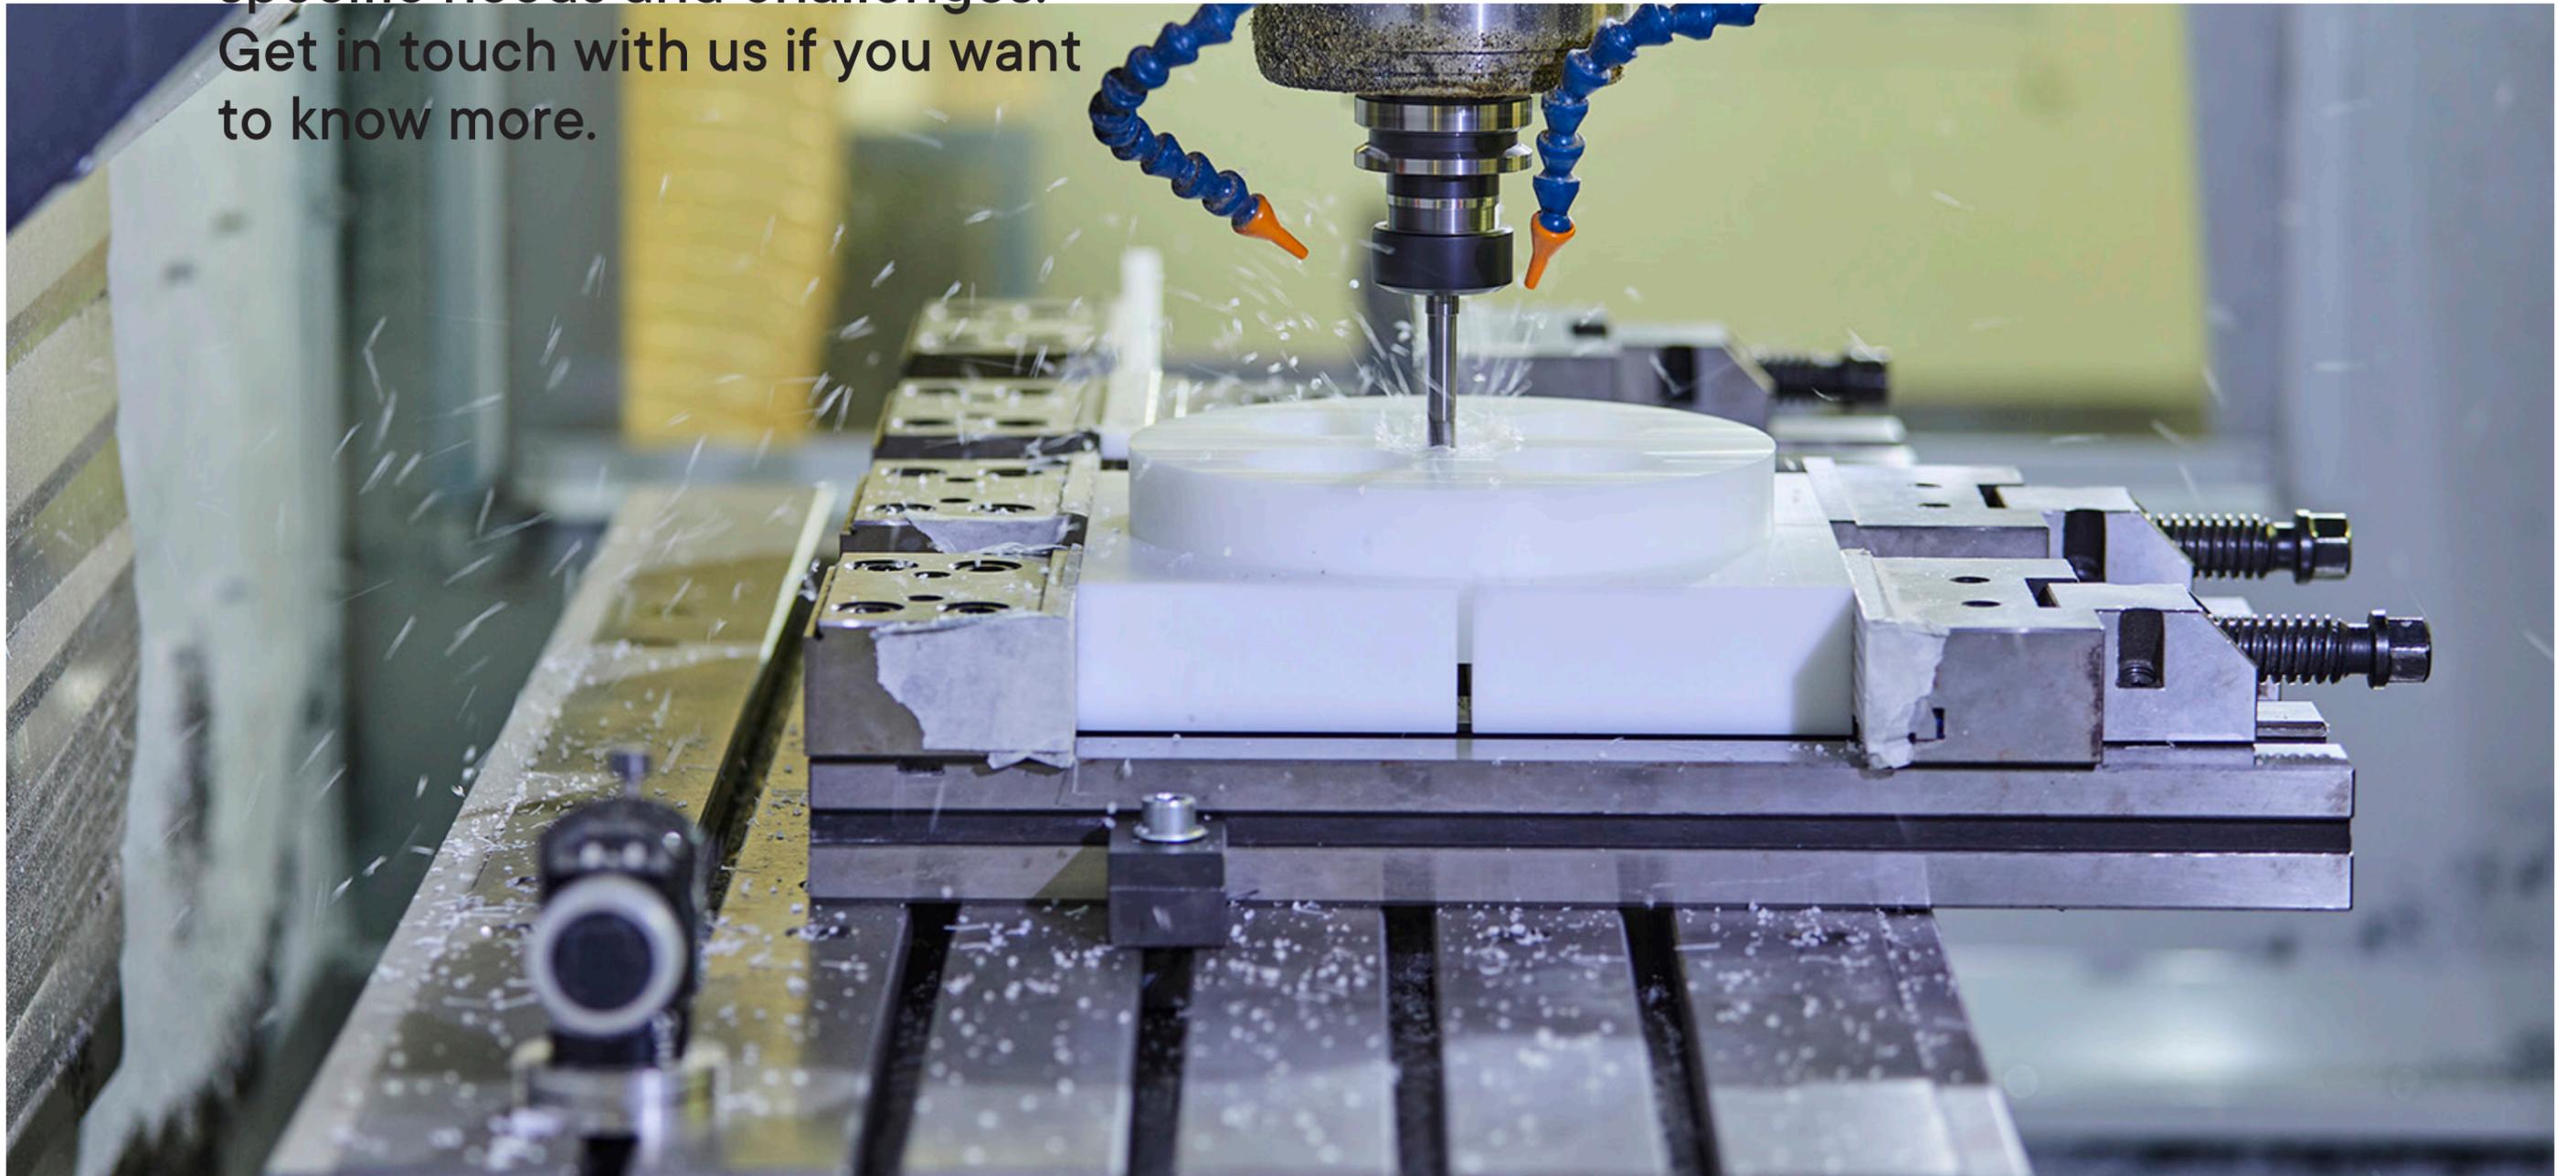

Milled part in black PEHD.

Examples of four turnings in POM with different surfaces.

Want to know more about plastics? We offer customised plastics seminars for customers and partners based upon your specific needs and challenges. Get in touch with us if you want to know more.

Converting to plastics

Converting from steel to plastics can be highly beneficial.

Milled parts in POM from our CNC machining centre.

We also offer engraving like this black POM with a laser engraving.

Huge dividends can be reaped when you switch to plastic. We are happy to conduct a review of your production system, completely without obligation. It could reveal where plastics afford both economic and environmental gains. Together, we can find the very best solution.

Induflex is your one-stop shop. We can accompany you on a journey from design, construction and production to assembly, packaging and distribution. Want to know more? We are ready to help.
